

solidian Primafloor

Do it right the first time!
Think Quality.

build solid.

Rusty buildings
should be my
future?

No thanks!

build solid.

Non-Corrosive

Superior Bonding

Chloride-Resistant

Up to 7x stronger
than steel

Lightweight

Non-corrosive properties of our reinforcements contribute to long-lasting durability, savings in future repairs and maintenance costs. Build it for next generation!

build solid.

With solidian reinforcements you can build ultra-lightweight and more sustainable structures. Compared to classic steel reinforcements we provide superior strength (up to 7 times stronger than steel).

CRACKS ARE
NOT AN
OPTION

Lightweight

Anti-crack

Quick
Installation

Non
Corrosive

Easy
handling

Lower
maintenance cost

Easy
cutting

Lower
transport cost

solidian Primafloor grid is used to eliminate screed cracks during 28days of drying and curing. **Primafloor** is lightweight, easy-to-use, Non-Corrosive screed reinforcement that will provide you with the perfect flooring. Whether you use it inside or outside, **Primafloor** will retain its properties. Perfect for terrace, balcony, garage, gym, garden, workshop, hall, office, industrial or even heavy-duty flooring. **Primafloor** is actually saving your time and money as you won't have to repair your floor again!

solidian Primafloor
NO Corrosion / NO Crack

Traditional Corroded
steel reinforcement

Without
reinforcement

Glass reinforcement
can solve old problems
with new solutions.

solidian Primafloor
1/2 or 2/3
Position of the
screed thickness

About **solidian**

Always one step ahead: with innovative products we can offer you perfect solutions for your needs

solidian has made a name for itself as a leading company that provides a wide range of solutions to improve construction structure.

We made a commitment to clients to provide them with customer service, technical support and being the leader in providing global innovative fiber material solutions. We use advanced technologies to produce special solutions according to your needs. Our functional grids are used to optimize product and processing properties in a wide variety of applications – including concretes, UHPC, cement-based mortars, adhesives, and dry-mix compounds.

Other Products

check out our website for more products and innovative solutions

solidian eGRID

Specially developed flexible grids in combination with electro conductive coatings provide high tensile strength and outstanding electro conductive properties. **solidian eGRID** is now also available with different conductive surface treatments for special applications in which electrical conductivity is important.

solidian GRID

is textile reinforcements made from various fibers such as carbon, glass, basalt, or hybrid and therefore is ultra-lightweight. Compared to classic steel reinforcement, **solidian** reinforcements have up to 7 times higher tensile strength and do not corrode.

solidian CONNECTOR

Non-corrosive Carbon, Basalt, or AR-Glass connector with Single or Double Open End suitable for construction reinforcement in masonry, arches and vaults. Perfect for reinforcement of buildings in earthquake-affected areas.

solidian Bricks

High-tech, non-Corrosive, AR glass or Carbon fiber reinforcement brick mesh on a roll for efficient crack control specially designed for any wall width.

solidian REBAR

The rod-shaped reinforcement **solidian REBAR** are combining high-strength fibers with extreme resistant resins. **solidian REBAR** are the right choice where ever high loads occur and components are permanently exposed to aggressive environmental influences.

solidian REMAT

The **solidian REMAT** transfer all the outstanding properties of our bars-shaped reinforcements, the **solidian REBAR**, to the mesh format. The result is robust and walkable mats for more efficient handling on the construction site.
